## PROFIEL

I am a motivated student with diplomas in graphic design and video content creation, currently expanding my expertise at Luca School of Arts Narafi in Brussels. Through internships and on-set experience, I've gained a solid understanding of the complete filmmaking process, from early planning to final delivery. I work well in various departments, adapt quickly, and enjoy contributing as a co-writer. My goal is to keep growing within the film industry and take on new challenges that strengthen my creative and technical skills.

## ME AS A PERSON

As a person, I'm driven by curiosity, creativity, and a strong passion for storytelling. I enjoy collaborating with others, taking initiative, and approaching problems with an open and practical mindset. Being involved in different film projects has taught me to stay calm under pressure, communicate clearly, and support a team wherever needed. I love exploring new ideas, learning new techniques, and staying active in the film world both inside and outside my studies.
